

Neuroticism

29292387

1. Stromal
(Fibroblast, Epithelial, Lung)

The figure is a circular genetic plot (Manhattan plot) for the trait Neuroticism. The plot shows the distribution of genetic variants across the genome, with a color-coded background representing different chromosomes. A specific cluster of individuals is highlighted in orange, with a blue circle and a crosshair marking a point within this cluster. This cluster is labeled '1. Stromal (Fibroblast, Epithelial, Lung)'. The plot is centered around a value of 29292387.

168,105 European ancestry individuals
